INFORMATICS

Bachelor's degree in Informatics Engineering with 2 years experience in mobile development using the Flutter framework and BLoC as state management. Additionally, I have experience working with the Laravel framework, JavaScript, Bootstrap, and MySQL to build websites and REST APIs.

SKILLS

PHP	Flutter	MySQL
Javascript	Laravel	Bootstrap
Dart	ReactJs	

WORK EXPERIENCE

WisdomPOS

September 2024 - Now

Build Restaurant POS application

Create and develop point of sales (POS) applications for restaurants, in this application there are features such as order lists, order history, reports, and systems for transactions. The application was created with the Flutter framework and BLoC as state management.

Cross Network Indonesia

June 2023 - December 2023

Expedition Application Development (Internship)

Creating and developing an Android-based application for cold storage companies, in this application several main features are created, namely a list of goods delivery schedules, tracking the location of expedition drivers and confirmation if the goods have arrived at their destination.

PROJECT

E-Commerce Application and Web Development

Create and develop Android-based e-commerce applications and admin websites for Wendy's stores. In this application there are main features, namely tracking customer location, payment gateway using midtrans, FCM (Firebase Cloud Messaging) to send notifications and several other features for purchasing goods.

Android & IOS Puzzle Games

Create games, slider puzzles based on Android and iOS. This application uses Firebase to store data in the database. The concept of this game is that the user must sort the numbers from 1-8 which will be randomized, then there will be time to determine the ranking.

Portofolio Websitte

Create a portfolio website using the Vite framework along with the Reactjs and Tailwind libraries.

EDUCATION

Bachelor degree Petra Christian University

Informatics Engineering
